

Relax,  
Enjoy,  
Live.

# Nurture nature - our mantra.

Eden's Envy Landscaping strives toward a singular goal - to establish a trusting relationship with each client through our **meticulous attention to detail**. We are not outdoor custodians; **we are gardeners** who cherish our reputation and natural resources equally. We design and construct installations which **seamlessly unify** natural and built environments, and the results are nothing short of subtly breathtaking.

This season's trend is the creation of **harmonious backyard havens** for the entire family. These might include an outdoor room with a concrete paver floor, walls and seating, adjacent to food prep surfaces with a gourmet grill and kitchen. A **fire pit, bocce court, and horseshoe pits** will keep your guests entertained. Your refuge simply must contain an **Aquascapes water feature** such as a waterfall streaming into a pond, or a pondless waterfall. These backyard retreats can be surprisingly easy to maintain, while also endlessly **educational and entertaining**.

Nearby, there might be a **recreational area** for children, perhaps a custom **swing set** with integrated fort, an enormous **sandbox, a trampoline** pit, and **see saw**. This entire space can be made **safe and durable** with the use of sand, rubber mulch, and a grass pavement system. We will integrate your own Eden seamlessly by incorporating numerous plantings for **shade, consis-**

**tent color, and fragrance**. Add **lighting for ambience**, and your **backyard vacations** will envelop you in **natural beauty and serenity**.

Be it an extensive residential installation, or standard prune weed edge mulch mow blow & go, our exceptional efforts will **exceed your expectations** and make your neighbors, well, er, **green with Envy**.
